Carrier-Approved & Public Safety DAS Solutions Nationwide

Infolink USA designs and deploys Distributed Antenna Systems (DAS) that ensure reliable in-building cellular coverage across commercial, industrial, and campus environments nationwide.

Trusted by organizations where connectivity is mission-critical.

Business Impact

Poor cellular coverage creates operational and safety risk.

- Dropped calls disrupt productivity
- Dead zones create safety concerns
- Tenants and employees lose confidence
- Mobile applications underperform
- Emergency communications may be compromised

We eliminate these risks with professionally engineered DAS solutions tailored to your environment.

What We Deliver

- Carrier-approved commercial DAS
- Public Safety DAS
- Multi-building and campus coverage
- Ongoing maintenance and system optimization

Nationwide service. Scalable solutions.

Who We Work With

- Corporate offices
- Industrial and manufacturing facilities
- Campuses and multi-building environments
- Organizations where connectivity is mission-critical
